The screenshot shows a Microsoft Teams meeting in progress. The main view is a video feed of a classroom with several rows of desks and chairs. A window is visible in the background. On the right side, there is a vertical list of participants, each with a circular icon containing their initials and a name. The list includes: HI Hem..., SN shilp..., B Banu..., A Angel, ST Sand..., HI Hem..., BD Bhav..., SR Sujit..., T Tejas..., AH Anus..., SP Sand..., MP Mrs..., S shub..., MK Mr..., MK Mr..., SS s sal..., and MP. At the bottom of the screen, there is a system tray with icons for volume, network, and battery, along with the time 12:17 / 12:11. A watermark 'Activate Windows' is visible in the bottom right corner.

ML SCANN

Linear Regression is a straightforward, interpretable model suitable for problems with linear relationships, limited data, and low computational resources.

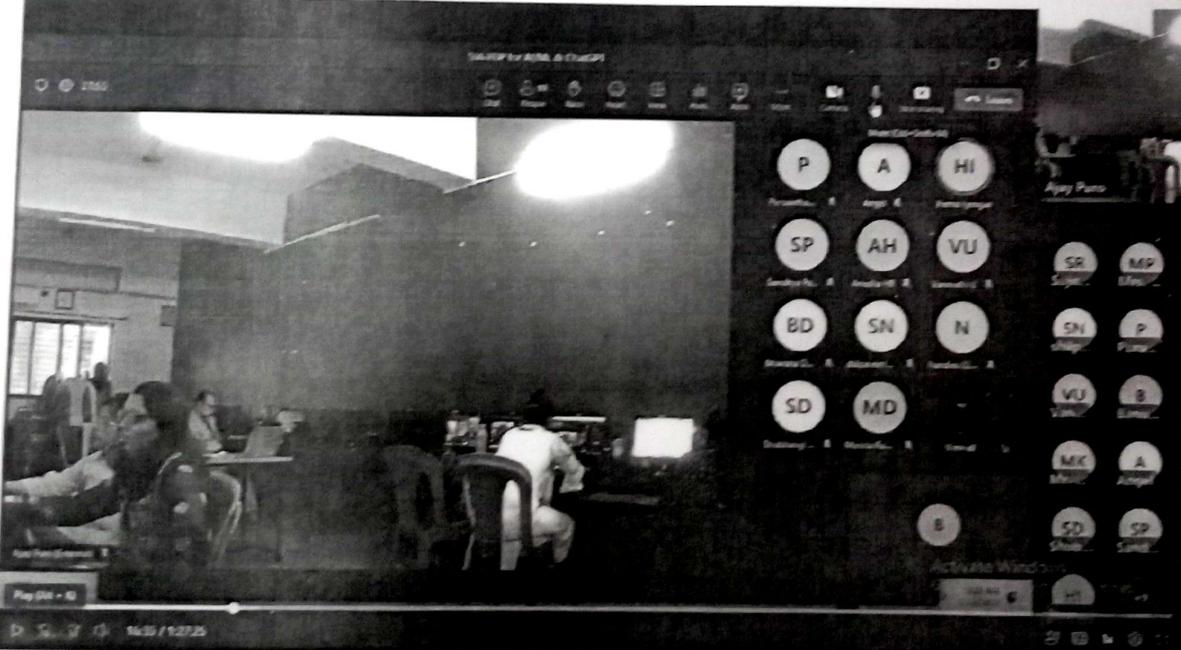

ANNs, particularly deep learning models, are more powerful, capable of handling complex and non-linear patterns in data but require more data and computational resources.

The choice between the two depends on the nature of the data, the complexity of the problem, and the trade-off between model interpretability and performance
